To Whom It May Concern:

**Re: Advantage Wireless / TELUS Mobility**

---

Edmonds Landscape and Construction Services Limited have been in business since 1966. We provide 12 month a year service to a variety of clientele including residential, commercial, institutional and Government related agencies.

Effective communication is a fundamental function necessary in our business, particularly throughout the busiest seasons when we must be able to maintain contact with our various crews, supervisors, sub contractors, and management staff to promptly deal with items which come up during every business day.

Edmonds have utilized the services of Carl Launt and his staff at Advantage Wireless since December 2000. During that time they have provided a high quality of performance, and demonstrate a commitment to providing reliable communication devices, a professional approach to our needs, and flexibility to our various fluctuating requirements.

We are pleased to recommend you consider the products and services of Advantage Wireless for your own personal or business endeavors.
