

On behalf of the Stevens Group of Companies I would like to provide the following referral letter for Advantage Wireless. I would also like to provide some background on the Stevens Group.

The Stevens Group of Companies is a third generation family business with the head office located in Dartmouth, Nova Scotia, Canada. The group has its roots in the construction industry starting with B. D. Stevens Limited in the early 1950's. Through hard work and the practice of providing quality products and services, it has grown into a group of companies with offices in all four Maritime Provinces as well as the Southeastern United States.

The primary focus of the group is in the construction industry and the large area in which the companies operate means that effective communication is fundamental to the success of our businesses. We have dealt with Advantage Wireless for a number of years and they have always provided us with excellent service.

The Account Managers have helped us analyze our needs and have recommended changes to our service that has improved our efficiency as well as provided financial savings. The construction industry is one that often operates on a very strict timetable and whenever we have required new wireless data or voice services Advantage Wireless has been able to meet our needs without delay.

We have dealt with other dealerships and carriers of wireless products and based on our experiences we would highly recommend Carl Launt and his team of professionals at Advantage Wireless.

Sincerely,

A handwritten signature in cursive script that reads "Gordon Haley".

Gordon Haley, CA
